Session Description

This special session deals with the problem of applying AI technologies to address global challenges in sustainable development and social impact. As AI advances, it holds tremendous potential to mitigate issues such as climate change, poverty, social inequality, and access to healthcare. However, implementing AI solutions in these areas poses significant challenges, including ethical concerns, data privacy, accessibility, and scalability. This session will explore how AI can be effectively utilized to foster positive change while addressing these obstacles, emphasizing the need for responsible, inclusive, and impactful applications of AI for the greater good. The goal is to provide a platform for discussing the integration of AI into sustainable development and to showcase innovative AI applications that address social challenges. The session will foster interdisciplinary collaboration, explore strategies for overcoming implementation challenges, and highlight how AI can be a force for positive change while ensuring ethical and sustainable practices.

The topics of interest include, but are not limited to:

- Ethical AI and Social Impact
- AI for Climate Change Mitigation, Adaptation, and Environmental Sustainability
- AI in Healthcare, Public Health, and Well-being
- AI for Economic Development, Poverty Alleviation, and Social Equityment
- IoT and AI integration for sustainable smart communities
