Session Code: **SS33**

Session Description

This special session deals with the problem of how Artificial Intelligence (AI) can be designed, developed, and deployed to support inclusive development, particularly for marginalized, underserved, and low resource communities. The session emphasizes human-centric, ethical, and context-aware AI approaches that aim to reduce digital divides and promote social, economic, and educational inclusion.

The objective of this session is to showcase innovative frameworks, real-world case studies, and scalable AI-driven solutions that align technological advancement with the United Nations Sustainable Development Goals (SDGs)—especially those related to equality, quality education, healthcare access, poverty reduction, and community empowerment. Researchers, practitioners, policymakers, and industry professionals are invited to contribute original research and practical insights demonstrating how AI can be leveraged as a tool for inclusive and sustainable global development.

The topics of interest include, but are not limited to:

- AI for rural and community development
- Local-language NLP and inclusive digital communication
- AI for accessible and inclusive education
- Assistive AI technologies for persons with disabilities
- Gender-inclusive and equity-focused AI applications
- Low-cost and low-resource AI solutions for developing regions
- AI for public service delivery, governance, and social protection
